

# MICRO 1100 HE

44MnSiVS6

Microalloyed steel with high yield strength and fatigue performance after forging or rolling

## APPLICATION

Components with **in-service mechanical characteristics after forging or rolling** by means of controlled cooling.

## ADVANTAGES

**High Yield Strength  
& Fatigue Performance**

Components (Engines) Downsizing

**Save of energy, installations  
and process time**

Removal of thermal treatments

## APPLIED TECHNOLOGY

- **Fine microprecipitation** of vanadium, niobium and titanium carbonitrides.
- Detailed control of the manufacturing processes in order to obtain a homogeneous distribution of precipitates.
- Thermomechanical rolling and controlled cooling.
